All rolls have 1,000 pads

Features:

- Unique high strength, high density blue carrier offers improved performance for today's longer processing times.
- Specially designed adhesive offers superior lens side and block side performance.
- Offered in shapes to match today's block styles and sizes.
- Double tabbed for easy removal.

Benefits:

- Improved consistency over other finishing pads.
- Conforms and adheres to all lens and block types.
- Unique carrier is thinner, yet stronger for a better bond between lens and block, thereby reducing axis failures.
- Easy, clean removal from block saves time and wear on blocks.
