**Our sport rx wraps offer a great alternative to inserts for prescription wearers, the duplex system enables great vision without the discomfort or cleaning issues associated with inserts.**

### Benefits

#### Good vision

The Duplex System takes into account the inclination of the frame and adjusts the prescription accordingly.

#### Comfortable fitting position

(if an interim frame is used, the glasses invariably slip to the front, or your eye-lashes touch the lenses).

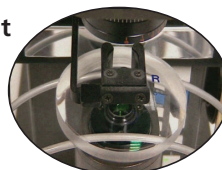

#### No condensation or dirtying of the interim lens surfaces

(hermetic sealing)

#### Minimum increase in weight

(lens weight only)

Straight

Angled
